Accomplished Senior Solution Architect

Information Management ~ Solution Architecture ~ Business Intelligence ~ Cloud

I am a highly skilled Enterprise Solution Architect with over 23 years architecture experience working with a diverse range of national and global organizations in the Banking, insurance, Telecom, healthcare and manufacturing sectors. I have a proven capability to deliver innovative solutions utilising my specialised skills in enterprise, application, information, integration, and cloud architectures, across the entire systems development lifecycle.

Profile Summary

~ Information Management	~ Solution Architecture	~ Data Warehousing
~ Software Design & Development	~ Business Intelligence	~ Data Analytics
~ Team Building & Leadership	~ Requirement Gathering	~ Reporting & Documentation
~ Business/IT Alignment	~ Enterprise Modernization	~ Multi-cloud Transformation

- **Accomplished Solution Architect** with **over 23 years** of experience that reflects year-on-year success in solution architecture, design, development and information management, data and application architecture, technology architecture, business architecture, data/systems/processes mapping, Azure Cloud currently associated with **Virtusa, Hyderabad as Enterprise Architect**

- Played a key role in **recognizing areas of internal improvement in emerging BI space such as in Memory Analytics, Cloud BI, Big Data Analytics and BI on Demand** and developed roadmap for implementing them and **Azure/GCP Data warehouse/BI Modernization**

- **Helmed IT strategy** and acted as Architect and **implemented key solutions in the BI/EDW domain** for advanced Data Analytics

- Led the **architecture** and data modeling effort for **Business Intelligence solutions** for the Chase bank to include Home Lending. Created conformed dimensions and measures. The solution was based on Oracle DB and hosted about 5 TB of data.

- Comprehensive experience in **developing models that represent complex and innovative business, data, application and technical subjects**

- Hands-on experience in **defining the information architecture and technology infrastructure** along with the design of multi-dimensional data models and the Business Intelligence delivery solutions

- Successfully **managed teams** in setting inspirational goals, defined KPIs & metrics for the team and ensured achievement of the goals while collaborating with senior & board level management team in decision-making process

- **Articulate leader with notable success in directing a broad range of corporate IT initiatives**, while participating in yearly planning, analysis & implementation of solutions in support of business objectives

IT Skills

- **Database:** SQL Server 2005/08 R2, Oracle 8i, 9i, 11G Including SQL, PL/SQL and associated tools
- **Data Warehouse:** End-to-end knowledge of inner workings of DW (Bids, SOW, Design, Build, Testing, Rollout, Maintenance, Reports and ETL, Teradata CLDM, FSLDM, EBS.
- **Business Intelligence:** IBM COGNOS, SAP Business Objects, Qlikview, Tableau, OBIEE, Atscale, Domo, Looker,
- **Others:** ODI, PRO*CO, TOAD, Power Designer, ERWIN, Clear Case, HTML, JavaScript, Microsoft Azure, AWS, GCB

Organisational Experience

Dec 20 – Till Date

LTI, Hyderabad as Head of Data Engineering

Key Result Areas:

- Work closely with business leadership to conduct Cloud Assessment, Cloud Suitability and Cloud Feasibility studies and establish Digital Strategy and Architecture Roadmap to facilitate migration to Azure/GCP Cloud Platform.
- Participate and collaborate with pre-sales team in writing RFP's and SOW's to layout cloud strategy and customer requirements, identify key objectives and KPI's for the projects.
- Developed comprehensive presentation decks to outline LTI Cloud Strategy for Customer Situations and lay out execution plan to deliver the solutions.

- Evaluate strategies to migrate Client aging Legacy Applications to Cloud Native Platform using Strangulation and Anti-Corruption layer patterns and established Cloud migration plan for Azure/GCP.
- Establish Digital Transformation Strategy and risk assessment models at executive and technical level, understand their functional and non-functional needs for highly scalable, available and resilient system.
- Evaluate Client Legacy applications to migrate into cutting edge technology such as Micro Services architecture and Cloud Native Platform.
- Reviewed, refined and suggested options for cloud platform architecture to meet customer IT infrastructure needs like high availability, high scalability and low cost resources.
- Provide thought leadership and architectural expertise to a cross-functional team charged with developing and deploying Cloud Native Applications on Azure/GCP Cloud.
- Provide technical design and detailed program specifications to the team members, track their progress and technical issue resolution.
- Mentoring developer team into new technologies

Jun'14 - Dec' 20
Virtusa, Hyderabad as Enterprise Architect

Key Result Areas:

- Assisting the Sales Team to **drive revenue by helping to qualify accounts, answer RFP/RFIs**, preparing and delivering solution based product presentations, and delivering proof of concepts which meet customer business requirements
- Designing the Azure solutioning for Healthcare transformation program (Migrating the existing Abinitio, Netezza, Attunity and reporting stack to Azure ADF, Databricks and synopses).
- From designing the warehouse to generating ETL code or quickly applying updates, Qlik (Attunity) leverages best practice and proven design patterns to help organizations achieve data warehouse modernization.
- Azure solution Architect supporting Pre-sales and Delivery projects for Microsoft Services. Have experience on scoping estimation, Sprint 0 planning, architecture stories backlog management for large engagements.
- Presented at Microsoft Internal and External Events on topics like Azure Service Fabric, Microservice architecture, Knowledge mining and Architecture Best practices
- **Analysing and planning experience in all phases of the development lifecycle** namely requirements analysis, gap analysis, impact analysis, migration, testing and implementation planning
- **Administering progress as per scheduled deadlines** for various clients and taking necessary steps to ensure completion within time and effort parameters
- **Directing Teams throughout software development life-cycle**, providing them support and guidance on technical and project-related issues; determining training requirements for the team members
- **Raising productivity levels** resolving complex problem and providing innovative solutions
- **Maintaining strong relationships with staff and clients** by using negotiation talent, persuasion as well as ensuring commitment; developing packages following best practices in multi-user environment
- **Planning, designing and executing performance tests** of the platform; providing user support and troubleshooting engaged in user acceptance testing of reports and projects sign-offs
- **Analyzing the impact of the change** with the existing structure and implementing the same on the system

Significant Accomplishments:

- Provide technical oversight and guidance during client's engagement execution
- Provide Cloud / Azure thought leadership through regular publications and speaking engagements
- Provide Azure technical expertise including strategic design and architectural mentorship, assessments, POCs, etc., in support of the overall sales lifecycle or consulting engagement process
- Be a critical part of our core team that is defining and launching exciting "Next Generation" services
- Responsible for collaborating on and setting cloud vision; providing thought leadership in cloud infrastructure and cloud services architecture to meet operational objectives for cloud solutions
- Educate customers of all size on the value proposition of managed services on Azure, and participate in architectural discussions to ensure solutions are designed for successful deployment in the cloud
- Played a key role by taking pre-sales responsibilities for new and existing GLOBAL customers covering platform evaluation and estimation, customer visits/presentation, pricing/profitability models, deployment/resourcing models, and acted as Solution Architect in the EDW and BI.
- Provided a highly scalable and robust solution by using best of the breed tools like Oracle, Ab initio, Trillium and Web logic for a leading Telco

- Evaluated and conducted research to provide recommendations/best practices/methodology and procedures to ensure reproducible development and implementation of high quality, while keeping the cost under control to improve the speed and efficiency by which data is secured and made usable
- Administered the migration of BI tools from Cognos, BO, MicroStrategy, Tableau, QlikView, Atscale.. etc
- Offered technical expertise in Multiple BI and Analytics Projects and OSS/BSS
- Maximized quality of deliveries and enhanced the business knowledge of the team by facilitating regular functional/technical training session

Previous Experience

Oct'06 – May'14

Wipro Technologies (USA, UK, Australia, Singapore, Indonesia, South Africa, Hyderabad) as BISr. Solution Architect

Significant Accomplishments:

- Participated in all programs that dealt with career development planning and performance evaluation
- Managed projects/SOW/RFP worth 5 Million USD to 30 Million that included 15 to 250 team size in Telecom, BFSI, Manufacturing, Energy and Utilities
- OSS/BSS with Wipro Technologies, provides solutions to Telcos in Operations covering the complete value chain. Was also handling the role of Regional practice manager for APAC region.
- Attained 'Single Version of Truth', interactive dashboard design, KPI, prediction, budget analysis, data governance, integration of disparate data source, avoided data duplicates (data reconciliation/Cleansing), different types of reporting needs and technical tool suggestions (COGNOS, SAP BO, Qlikview, Tableau, OBIEE, BI APPS, TM1)
- Successfully imparted knowledge transfer trainings (cross-training, trained the trainer approach, CBT based), negotiated with training vendors, provided team with technical updates, brainstorming sessions, one-to-one sessions as well as arranged corporate trainings
- Gained stakeholders attention, reconciled their needs against given timelines, created awareness about the threats and challenges of not meeting the deadlines, formed multiple specialist workstream, recruited workstream leads, ensured completion of job by educating the project plan, timeline and the impacts of not delivering
- Pivotal in improving enterprise IT strategies and practices for client engagement, project methodology, architectural governance, enterprise documentation, data migration, development team evolution, and data governance support
- Directed development planning, project strategy, review, post-implementation, technical roadmap (integration, conceptual, logical and physical data model), testing, and procurement

Jul'05 – Jul'06

Aztec Software, Bangalore as BI System Manager

Significant Accomplishments:

- Played a key role in administering overall work related to Dashboard Design, Canned Reports, Analysis, Information Delivery, Querying, and Ad-hoc reporting
- Evaluated and selected database/data warehouse components that included hardware, relational database management systems, ETL software, meta data management tools and database design solutions
- Developed and managed BI training, documentation, policies and procedures, and helped desk support
- Ensured extensive EA coverage of interactive dashboard design, KPI, prediction, budget analysis, data governance, integration of disparate data source, avoided data duplicates (data reconciliation/Cleansing), different types of reporting needs and technical tool suggestions

Dec'04 – Jun'05

LogicaCMG, Bangalore, BI Solution Architect (Reporting, Data Warehouse)

Significant Accomplishments:

- Spearheaded and administered overall solution design and architecture for directing disparate system and get connected as part of Cerner Application to achieve meaningful use criteria
- Engaged clients about the common approach to work around interim solutions like Ad-hoc and Canned Reports (OLTP, OLAP & MDX); successfully managed supplier's requirement after reconciling Trusts' internal & external needs
- Directed large Implementation Team with different workstream nature, multiple client sites, product customization, winning additional business, reconciled service level agreement, and managed penalty, lend resources on loan to other organizations as part of the program

Jul'04 – Dec'04

Tata InfoTech, Bangalore as BI Specialist

Significant Accomplishments:

- Created and maintained Cognos Reports using Power Play and Report Net
- Published & maintained the BI Reports (Excel format) in the SharePoint portal
- Managed the ad hoc issues and requirements from client

Oct'03 – Jul'04

Covansys, Chennai as BI Specialist

Significant Accomplishments:

- Pivotal in designing Enterprise Data Warehouse and BI Solutions
- Developed high level and low level design specifications
- Ensured adherence to quality norms across the development and implementation process
- Played a key role in setting up and maintaining documentation and standards
- Acted as Onsite Project Coordinator and interacted as well as coordinated with Business Team, Onsite Technical Team, Offshore Development Team and project key stakeholders

Jan'99 – Sep'03

Inspira Technologies, Hyderabad as Member of Technical Staff

Significant Accomplishments:

- Contributed in database design, preparation of BRD, PSD and development of ETL
- Played a key role in performing code review, unit testing and testing of teams work

Oct'97 – Dec'98

Frontier Technologies, Hyderabad as Software Engineer

Academic Details

- **Bachelor of Engineering (Industrial and Production)** from University of Mysore in 1996

Trainings Attended

- Data Modelling and Integration Cognos
- Business Objects Oracle BI Apps

Clients Worked For:

- UHG Optum(USA)
- Tata Sky
- JPMC(USA)
- CITI Bank (USA)
- Universal Sampo (Japan)
- Homeserv (UK)
- MTN (Mobile Telecom Network) South Africa
- Telkomsel (Indonesia)
- Vodafone (UK)
- Cable and Wireless(Bahamas)
- Citi Bank (Singapore)
- Western Power (Australia)
- Lloyds Bank (UK)
- PitneyBowse (USA)

Personal Details

Date of Birth: 5th July 1972

Languages Known: English, Hindi, Telugu & Kannada

Present Address: A4, Sahithi Residency, Kondapur, Hyderabad, 500084
